

WANNASA WONGDEE (LENA)

My Portfolio

Phayom, Wang Noi, Ayutthaya | 080-042-5082 | wannasa.won@spumail.net

Computer Science student with experience in web development, AI chatbots, and e-commerce projects. Skilled in front-end, back-end, databases, and API testing. Seeking an IT internship or junior position to develop my skills and contribute to a technology team.

TECHNICAL SKILLS

Programming Languages: CSS, JavaScript, Python, C#, HTML,

Frameworks : React , ASP.NET MVC

Testing & Tools:

- API Testing (Postman, Swagger)
- Bug Reporting
- User Flow Testing

Databases & Tools: MySQL, MongoDB, n8n, Git/Github, Docker,

EDUCATION

SRIPATHUM UNIVERSITY

2023 - PRESENT

- School of Information Technology Bachelor of Science in Computer Science
- **Current GPAX:** 3.96

PROJECTS

Online Wholesale Shrimp E-Commerce Platform | Full-Stack Developer & Tester

- Designed and executed manual functional test cases for user authentication, product catalogs, and transaction flows to ensure zero-error operations.
- Utilized Postman to test and validate backend API endpoints, verifying request/response payloads and status codes.
- Managed data integrity by validating database entries and configurations against system logic.

Tech Stack: JavaScript, C#, HTML/CSS, MySQL, Postman

Custom AI Chatbot Application & n8n Automation | Developer & Integration Tester

- Built, trained, and tested a custom AI model interface alongside automated Discord workflows via n8n.
- Conducted integration and end-to-end testing to ensure seamless communication between AI APIs, the application UI, and external platform webhooks.
- Troubleshoot and resolved logical errors and latency issues during chatbot workflow execution.

Tech Stack: Python, JavaScript, HTML, CSS, n8n, Discord API, Postman

Pet E-Commerce & Warehouse Management Systems | Full-Stack Developer

- Developed web platforms featuring complex inventory schemas and shopping cart workflows.
- Performed boundary value analysis and equivalence partitioning concepts to test stock level inputs, minimizing potential database exceptions.

Tech Stack: JavaScript, HTML, CSS, NeonDB, Postman

PairPlate - AI Nutrition Chat Assistant | AI Chatbot & Full-Stack Project

- Developed a bilingual AI nutrition chatbot using React and FastAPI.
- Implemented user profiles, BMI calculation, health-condition rules, and RAG-based food data retrieval.
- Designed Thai and English chat responses to support personalized food recommendations.

Tech Stack: React, FastAPI, RAG, Groq LLM, Thai/English Bilingual Support

n8n Automation Workflow Lab | Workflow Automation & API Integration

- Built an automation workflow using n8n to receive, validate, and process webhook data.
- Integrated Google Sheets and Discord for data storage and notifications.
- Tested API requests using Postman and implemented input validation and error handling.
- Tech Stack: n8n, Docker, Postman, Google Sheets, Discord API.

WORK EXPERIENCE

Administrative Assistant | December 2025

- Managed and verified corporate financial records, invoices, and billing statements with zero discrepancy.
- Maintained data accuracy and organized company documentation.
